

On Tuesday, I wanted to go to the park, so I ask my father to go to park with me.

At the park I saw Ttomy waving at me and saying "Hi Song Moo!" and then I say back to Ttomy "Hi Ttomy!"

While we were walking Ttomy saw a worm wiggeling in the dirt so Ttomy said to me, "Look, there is a worm!" And then he pointed at it and then I said "oh, it's a worm!" And then Ttomy said, "so let's cut the worm. It will be fun!"

Next to the worm we saw a piece of glass so Ttomy picked up the piece of glass and he cut the worm in to $\frac{1}{2}$ but the worm didn't died so Ttomy cut the worm in to $\frac{1}{4}$ but the worm didn't died so I said "This is interesting" and Ttomy said "

Yes, this is interesting." But we had a trouble to know which side was head and which side was tail so we decide to cut both sides but the worm was still wiggling in 6 little pieces so I said "Let's just wait untill the worm died because it will not died even if we cut the worm in to 10." so we wait and wait and finally the two pieces of worm died but the other pieces of worm didn't died so we wait another while. After a while the wiggley worm died so I said, "finally the wiggley worm died."
